

Book Title: India's Resource Security: Trade, Geopolitics and Efficiency Dimensions

Chapter Title: Indian Rare Earth Industry: Need and Opportunity for Revival and Growth (Chapter 12)

Publication Details: Pages: 147-154; Year: 2018; Published by: [TERI](#) & [KAS](#)

Authors: Parveen Kumar and Mridula D. Bharadwaj

Abstract

For the success of global efforts in climate change mitigation, pollution control and energy security with low carbon economy, sustainability of the rare earth industry is important. India has proven its expertise in the upstream sectors, which includes exploration, mining and extraction. However, it has shown limited expertise in the downstream sectors of the rare earth value chain. Effective networking amongst the government, educational institutions, national and international collaborations and private sector organisations is crucial for the success of the Indian rare earth industry.
